OVERVIEW

YOUR COURSE GUIDE

Learning is not just an activity, it's an attitude. The things we see, hear, feel and experience every day become part of our learning journey.

At Woolworths, there are so many opportunities to develop and grow. Besides formal courses, there are other interesting ways to broaden our experience, such as attachments in various business areas, just-in-time online learning content (which you can find on the A+ e-library) and courses which are available through our various BU Academies and Development Programmes.

In this guide you will find all the management and leadership courses that we offer. These are over and above what your business unit provides in formal courses. Use this as a guide to identify formal learning opportunities to help you perform your job and grow your career at Woolies.
